This report in respectfully submitted by the undersigned. We congratulate the town that the vote passed at the last March meeting on motion of Col. E. Q. Fellows authorizing the selectmen to float the Town Debt if possible at 3 per cent. has been completely successful. The indebtedness of the town is now in Five-twenty Bonds at three per cent.

Since 1880 the town indebtedness from about \$52.500 00

has been reduced to \$40,000 00 in 1887.

The rate of interest has been reduced from 6 per cent. and upwards in 1867 to, 5 per cent. in 1876, to 4 per cent. in 1885, and 3 per cent. in 1886. The yearly interest on the debt has been reduced from \$4,380 00 in 1867 to \$1,200 00 in 1887, a reduction of of \$3,180 00 in the interest annually due.

SCHOOL REPORT.

The school board in making this their first annual report under the town system naturally contrast results with those attained under the district system. (We use the former numbers of the districts for

convenience.)

Nufeteen different schools were maintained in town in 1885, and the seventeen school houses were used, and also a dwelling-house and a school house in Albany. The past year, eleven different schools have been maintained in twelve different school houses; leaving the school houses in districts Nos. 2, 5, 15, 17, and 19 unused. The school house in No. 1 is almost worthless, and the removal of the No. 2 school house to a location near the former house of the late Dr. Moses Hoyt would, in our judgment, accommodate all the scholars in the two districts. The school houses in Nos. 15, 17, and 19 are not now needed for school purposes and might be sold before they suffer further deterioration, unless it is thought that the time will soon come when they will again become useful. The scholars in Nos. 5 and 17 have been transported for the year to the Chiek school house (No. 6) at an expense of one-half the cost of maintaining schools in the two districts in 1885; while there have been eighteen weeks of school the past year in No. 6 as against fourteen weeks the year before in No. 5, and about six weeks in No. 17, and twenty weeks in No. 6 (where board was then given). In No. 15 (Bennett district) there were eight weeks of school in 1885 at an expense of \$36.00; the past year, by paying \$14.00 for transportation to the Whiteface school house (No. 9), the scholars in No. 15 have had the benefit of nineteen weeks of school. In the Currier district (No. 20), by the payment of \$18.00 dollars for four weeks of school and allowing Albany children to attend, our scholars have had the advantages of seventeen weeks of school.

Board, if reckoned at \$2.00 per week, was given in 1885 to the amount of \$68.00; whereas nothing has been given the past year.

Seven different male and eight different female teachers have been employed in the public schools during the year; in the year previous, five different male and twenty-one different female teachers were employed.

The expense of all the schools in 1885 was \$1447.41; the expense for same in 1886 has been \$1352.75; while in 1885 the average length of all the schools for the year was 12.7 weeks, and the past year 20 weeks. The incidental expenses in 1885 were \$139.91; the past year they were \$76.75; making a saving of \$63.16, and the excess in value of wood and school utensils now on hand above what was on hand at the beginning of the year is from ten to fifteen dollars.

Whereas in seven schools, two years ago, the average attendance was six or less, it will be seen by the Statistical Table that in the past year all such small schools have been abolished; thus inciting by that competition and enthusiasm which arises from the association of pupils a greater endeavor to excel both in their studies and their at-

tendance.

The average tuition fee per week for each enrolled scholar attending two weeks or more throughout town was in 1884, 33 1-3 ets., in 1885, 41 7-10 ets., while for the past year under the new system it has

been reduced to 25 1-20 cts.

From these comparisons and from others which will readily suggest themselves to the minds of the citizens from data furnished in the Statistical Table and the Statistical School Report and from facts within their personal knowledge and observation, it will be easy to determine the camparative merits of the two systems as applicable to this town. For ourselves, notwithstanding the fact that our population is scattered over quite a large territory, we feel constrained to say that results show the present system to be preferable here to the old one. Of course, in some individual cases, there has been a greater inconvenience in distance traveled than formerly; but this is more than offset by the general advantages secured throughout the entire town. And past and future experience can be trusted to remove whatever friction has resulted from the practical operation of the law.

Greater interest in the schools on the part of parents still continues to be a pressing need. Visit the schools when you can. See that your children go to school in season, and return home in season. Encourage and assist them in studying some at home. Find out what kind of a moral education they are getting while away from parental care. Home co-operation is the main pillar of a good

school; home indifference its chief damper.

Thanking you for the willingness you have manifested to co-operate with the Board in giving the new system a fair trial, this report is respectfully submitted together with the Statistical School Report, the annexed Statistical Table, and the following account of Receipts and Disbursements.
